Discover universes

where the sun never sets

A large, bright yellow sun is positioned low on the horizon, casting a warm, orange glow across the sky. In the foreground, a body of water is filled with numerous birds, likely flamingos, standing and wading. The background shows a dark, silhouetted shoreline with some structures visible on the right. The overall scene is a serene sunset or sunrise in a coastal or wetland area.

The origin of the universe

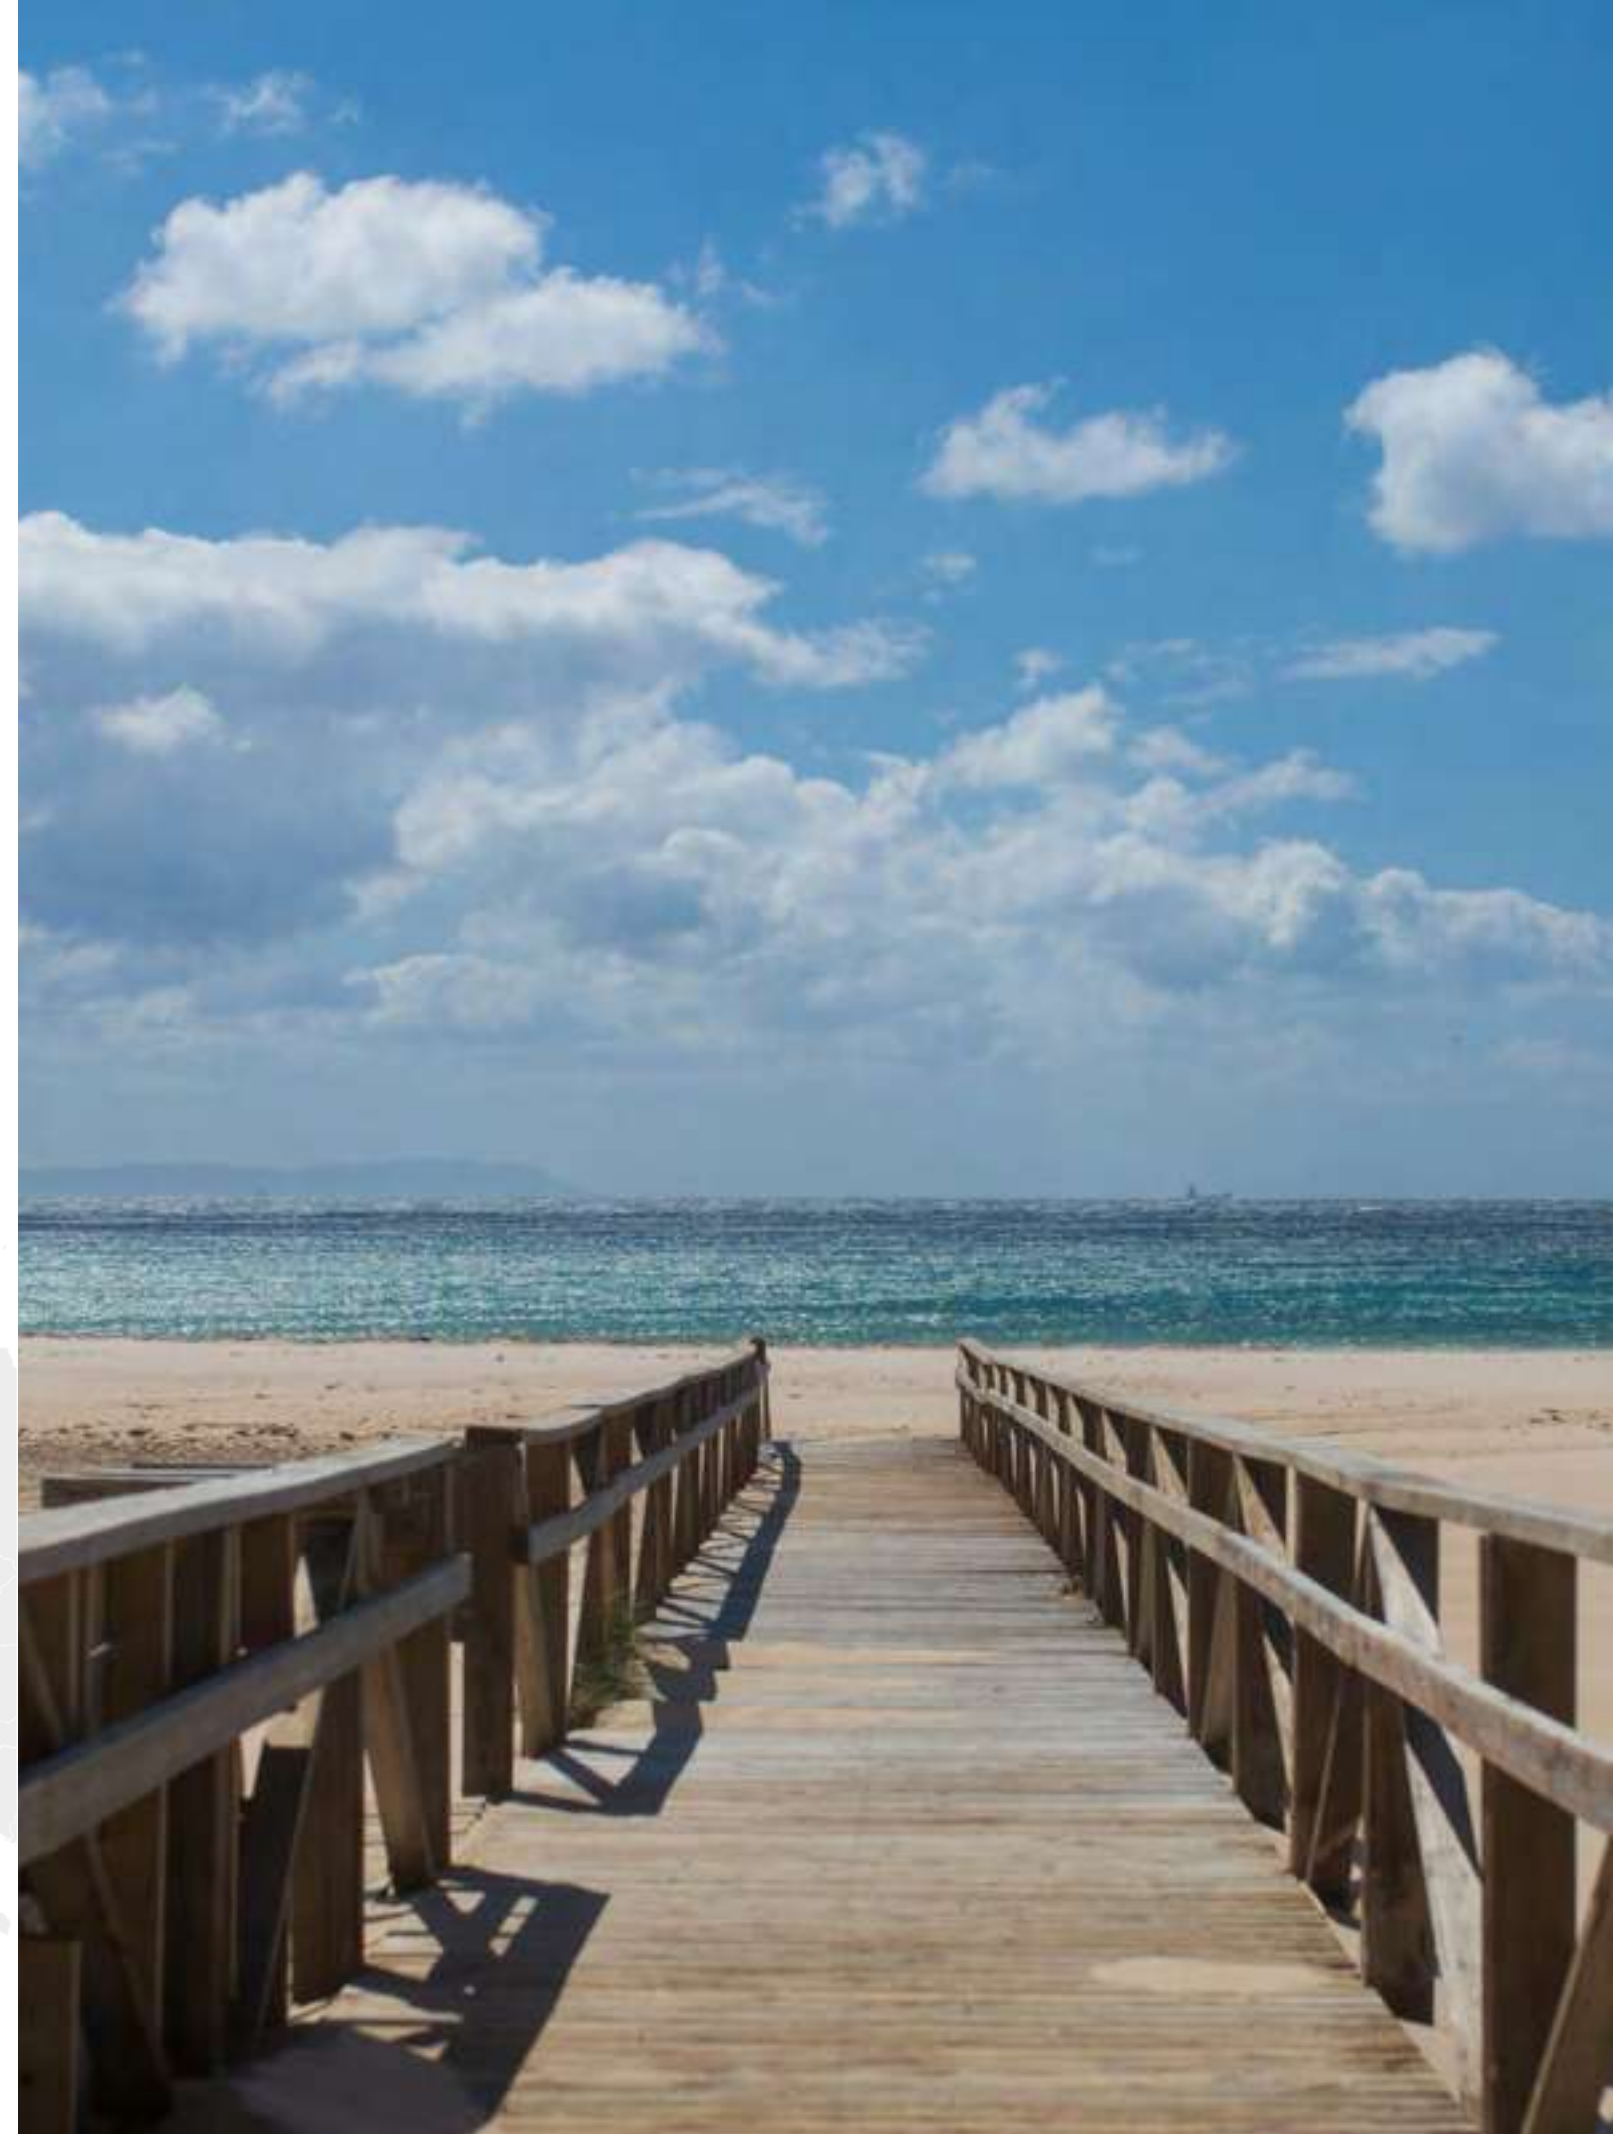

Andalucía

Andalucia is the place where all the universes you can imagine begin.

The southernmost region of continental Europe, Andalucia is a land of deserts, high mountains, landscapes, forests, tropical sites, beaches and cliffs, whitewashed villages, historical sites and modern cities, castles, Baroque mansions and fabulous Moorish palaces.

The eight Andalusian provinces have worked as ideal locations for the creation of many universes the cinematic imaginary preserves today, from Planet Naboo in Star Wars to the Kingdoms of Dorne, Mereen or the Dothraki Sea in Game of Thrones. Andalucia, the only place where you can find James Bond, Lawrence of Arabia, Indiana Jones or Lady Di.

A universe where you can build your own universe, with highly qualified professionals and companies, large diversity of locations, 30% tax rebate, free assistance, safe destination, funding, talented and awarded professionals recognized nationally and internationally.

Andalucía Film Commission

Andalucía Film Commission is a nonprofit institution that aims to promote Andalusia as a place of shooting giving free assistance and supporting companies and professionals of the audiovisual industry in the logistics of their productions.

Since its inception in 1998, Andalucía Film Commission reports on possible locations in Andalusia and coordinates the audiovisual industry and production companies with the government, performing a work directed to attracting tourism and therefore creating a beneficial economic impact in the Andalusian region.

It also has signed agreements with public and private institutions from different provinces of Andalusia to create the Film Cities Network, providing the best coverage of audiovisual production needs throughout Andalusia.

National Productions and Coproductions

- Spanish investments in film and audiovisual production are often carried out via an EIG (Economic Interest Grouping) which is set up as the film's producer. These investments give the producer the right to a tax credit of 30% of the first million Euros, and 25% if the investment is higher, with a maximum of 10 million Euros per production.
- The base for the deduction is equal to the total production cost plus the cost of copies, advertising and promotion financed by the producer (with a limit of 40% of the production cost).
- The law establishes a territorial requirement and 50% of the deduction base must correspond to the expenses incurred in Spain.
- It also specifies that the total tax incentive amount received must not exceed 50% of the production cost.
- In the case of a co-production, the amounts will be determined for each co-producer, according to their respective share-percentage of the co-production.
- Once the film's nationality certificate has been obtained and the rest of the requirements have been fulfilled, the tax rebate can be applied for during the month of July in the year after the production end-date.

Film Cities Network

To provide the best audiovisual production's coverage, Andalucía Film Commission has signed agreements with both public and private Andalusian institutions. The result of it is the creation of the Film Cities Network, a regional network which covers the territory with physical and virtual offices.

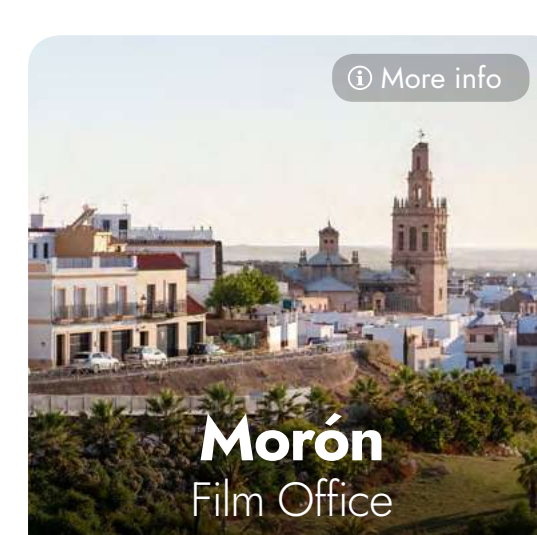

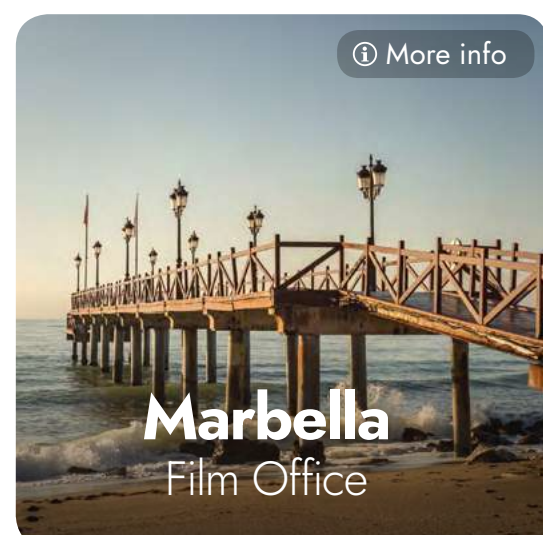

The Film Cities Network offices, coordinated by Andalucía Film Commission, provide personalized assistance by facilitating permits to film in their territories and offering their locations to the audiovisual industry.
